

In the Abstract

Please amend the abstract as follows:

The invention relates to an optical alignment system ~~comprising~~ including an optical board connector with a ferrule assembly terminating a plurality of optical fibres and a circuit board comprising a cavity for at least one embedded device, said circuit board comprising first positioning elements. The circuit board ~~comprises~~ includes a plate exposing said cavity and having an accurate position with respect to said cavity and said ferrule assembly ~~comprises~~ includes second positioning elements adapted to cooperate with said first positioning elements made available by said plate to align said terminated optical fibres and said embedded device.
